

Our new Hypot® Series raises the bar for production line Hipot testing. Improve traceability with on-board data storage and easily transfer test result data and test settings via convenient front panel USB. Take the guesswork out of your production line with the direct barcode connection to quickly associate products with pre-programmed test files. We've included advanced features like improved security and a touch screen interface that provides custom pop-up prompts displayed before each test step. We've dramatically reduced the weight and footprint of the Hypot® Series to make safety compliance a less strenuous ordeal. Quickly interconnect with the HYAMP® Series to form a complete safety compliance system.

## Find the Model that Fits Your Testing Needs

\*Meets 200 mA short circuit requirements

## SAFETY & PRODUCTIVITY FEATURES

Remote Safety Interlock Easily disable HV output

Data Transfer Easily import/ export test files and data via USB

Barcode Capability Direct barcode connection

Multiple Languages Multi-Language user interface

PLC Remote Basic PLC relay control

Prompt & Hold Provides alerts & instructions between tests

Advanced User Security Customize ID & password protection

Interconnection Interconnect with HYAMP® to form a complete test

Ramp-HI® Reduce ramp time during DC Hipot

Charge-LO® Confirms proper DUT

FailCHEKTM
Confirms
failure
detection

Accredited Cal Accredited calibration options

Why We Use Counts				

DIELECTRIC WITHSTAND TEST MODE CONTINUED

Why We Use Counts
Associated Research publishes some specifications using "counts" which allows us to provide a better indication of the instrument's capabilities across measurement ranges. A count refers to the lowest resolution of the display for a given measurement range. For example, if the resolution for voltage is 1V then 2 counts = 2 V.
