

Excellent Performance Ultimate Experience

PVP2000 Series high Z passive probe

Main Features

- ▶ PVP2150: 1X/35MHz, 10X/150MHz, one/two probes kit
- ▶ PVP2350: 1X/35MHz, 10X/350MHz, one/two probes kit
- ▶ 10X or 1X switchable
- ▶ 10 pF to 25 pF compensation range
- ▶ 1X:
 - 1M Ω \pm 1% input resistance
 - 50 pF \pm 20 pF input capacitance
 - 150 VRMS CAT II max. rated input voltage
- ▶ 10X:
 - 10 M Ω \pm 1% input resistance
 - 10 pF \pm 5 pF input capacitance
 - 300 VRMS CAT II max. rated input voltage
- ▶ New design in appearance brings you perfect user experience

Key Applications

- Best choice for low level signal measurement
- Circuit design application
- Embedded debugging
- Power design measurement

Marketing Strategy

- Drive sales of RIGOL probe accessory products
- Drive sales of RIGOL oscilloscope products
- Improve the awareness of RIGOL brand

Schedule

Public Introduction: September 1st,2016
Order Start: September 1st,2016

Price

PVP2150 One Probe Kit: \$ 33
PVP2350 One Probe Kit: \$ 44

(PVP2150 and PVP2350 Two Probes Kit are only the standard accessories for an oscilloscope.)
