## Digitally Controlled DC Linear Power Supplies

- Very high precision, very low noise, excellent dynamics
- Advanced user interface with direct numericentry and incremental rotary control
- Ten store/recall setup locations
- Thirty store/recall setup locations
- Fully isolated outputs for maximum flexibility
- Constant voltage or constant current operation with automatic crossover and mode indication

The Sorensen XDL Series represents the 'next generation' of high performance laboratory power supplies. Using linear technology and unrivalled performance in regulation, output noise and dynamic performance is achieved. High precision is also achieved by using instrumentation quality 16 -bit DAC to control voltage and current enabling voltage set points at 1 millivolt resolution. As the XDL is highly accurate, it can be used as a calibration source for some handheld DMMs

Direct Numeric Keypad Entry and Incremental Rotary Control Unlike other digitally controlled units, the XDL Series provides both numeric and rotary control while the illuminated keys and display legends provide instant confirmation of settings and status. Precise settings can be made by direct numeric entry using the 0 to 9 keypad. For gradual settings, a jog wheel is available for incremental or decremental changes in voltage steps of 0.1 volt, 1 millivolt or 10 millivolt and current steps of 0.1 amp down to 0.1 milliamp. The jog wheel can be engaged permanently or disabled.

Multiple Ranges For Greater Flexibility The XDL Series provides multiple ranges for voltage and current settings. Each model offers three output ranges per output.

For added convenience the XDL series provides storage of up to ten power supply set-ups in nonvolatile memory ( 30 set-ups for a triple). Upon shutdown of the supply, the settings are saved and automatically restored at switch-on

OVP and OCP Trips with Alarm Output The XDL Series provides fully adjustable over-voltage and over-current protection. The over-voltage and over-current protection feature provides a failsafe mode of operation to prevent an accidental

or incorrect setting, as well as protect against undesired load conditions. A trip condition switches the rear panel alarm signal, which enables other equipment to be controlled. Alarms can also be activated by over-temperature and excess voltage on the sense terminals.

## USB/GPIB/RS-232 Interface

The multiple interface card enables remote control and readback via either USB, GPIB or RS232. On triple-output models, the single interface address controls all three outputs. The USB interface is for medium speed PC connectivity and enables multiple devices to be connected. A Windows ${ }^{\circledR}$ device driver is supplied, which creates a virtual COM port, enabling USB to be used in applications that do not directly support it. The GPIB interface conforms to IEEE488.2 and IEEE488.1

Remote Sense and Local Sense
The XDL series provides full remote sense capability via dedicated sense terminals to maintain regulation at the load. When remote sense is not required, internal local sensing can be selected.

Linked and Copy Mode
The XDL triple-output models have two identical independent and isolated outputs. In situations where the user wishes to set similar voltages and current on both outputs, the "linked" mode is available. When linked, all adjustments are simultaneously applied to both outputs. The "copy" function allows all the settings of one output to be duplicated on the other prior to linking. For greater flexibility and convenience, the outputs can be linked when set to different voltages or current, allowing separate settings to be recalled into the linked mode memories for simultaneous recall.

| Output Range 3 | $0-35 \mathrm{~V}, 0-500.0 \mathrm{~mA}$ | 0-35 V, 0-500.0 mA | $0-35 \mathrm{~V}, 0-500.0 \mathrm{~mA}$ | 0-35 V, 0-500.0 mA | $0-56 \mathrm{~V}, 0-500.0 \mathrm{~mA}$ | $0-56 \mathrm{~V}, 0-500.0 \mathrm{~mA}$ |
| Outputs | 1 | $2+1$ Aux | 1 | $2+1$ Aux | 1 | 1 |
| Output Power | 105 W | 215 W | 105 W | 215 W | 112 W | 112 W |
| Interface (GPIB/RS-232/USB) | No | No | Yes | Yes | No | Yes |
| Voltage Setting | By floating point numeric entry or rotary jog wheel; resolution 1 mV |  |  |  |  |  |
| Current Setting | By floating point numeric entry or rotary jog wheel; resolution 1 mA or 0.1 mA depending on range |  |  |  |  |  |
| Voltage Setting | Resolution 1 mV <br> Accuracy $\pm(0.03 \%+5 \mathrm{mV})$ |  |  |  |  |  |
| Current Setting | Resolution $1 \mathrm{~mA} ; 0.1 \mathrm{~mA}$ on 500 mA range <br> Accuracy $\pm(0.2 \%+5 \mathrm{~mA}) ; \pm(0.2 \%+0.5 \mathrm{~mA})$ on 500 mA range. |  |  |  |  |  |
| Output Mode | Operation in constant voltage or constant current modes with automatic cross-over and mode indication by LEDs. |  |  |  |  |  |
| DC Output Switch | Illuminated when output is on. Preset voltage and current limit displayed when output is off. |  |  |  |  |  |
| Output Terminals | 4 mm terminals on $19 \mathrm{~mm}\left(0.75{ }^{\prime \prime}\right)$ spacing. Duplicate rear panel sense terminals on remote control models (XDL35-TP) |  |  |  |  |  |
| Load Regulation | Voltage: $<0.01 \%+2 \mathrm{mV}$ Current: $<0.01 \%+250 \mu \mathrm{~A} ;<0.01 \%+50 \mu \mathrm{~A}$ on 500 mA range (measured at output terminals using remote sense) |  |  |  |  |  |
| Line Regulation | Voltage: $<0.01 \%+2 \mathrm{mV}$ for $10 \%$ line change Current: $<0.01 \%+250 \mu \mathrm{~A} ;<0.01 \%+50 \mu \mathrm{~A}$ on 500 mA range |  |  |  |  |  |
| Ripple and Noise | Typically $<0.35 \% 1 \mathrm{mVrms} 2 \mathrm{mVp}-\mathrm{p}$ CV mode, and $<0.2 \mathrm{mArms},<20 \mu$ Arms ( 500 mA range) CI mode |  |  |  |  |  |
| Transient Response | $50 \mu \mathrm{~s}$ to within 15 mV of set level for a change in load current from full load to half load or vice versa |  |  |  |  |  |
| Temperature Coefficient | $< \pm(50 \mathrm{ppm}+0.5 \mathrm{mV}) /{ }^{\circ} \mathrm{C},<(100 \mathrm{ppm}+1 \mathrm{~mA}){ }^{\circ} \mathrm{C},<(100 \mathrm{ppm}+0.1 \mathrm{~mA}) 500 \mathrm{~mA}$ range typical |  |  |  |  |  |
| Remote Sense | Eliminates up to 0.5 V drop per lead. Remote sense operation selected from front panel and indicated by LED |  |  |  |  |  |
| Sense Terminals | Recessed sprung sockets for direct insertion of wires. Duplicated on rear terminal block (P versions only) |  |  |  |  |  |
| Auxiliary Logic Output | Voltage |  | 2-7V or 5V, selectable by front panel switch |  |  |  |
|  | Voltage Accuracy |  | $\pm 5 \%$ |  |  |  |
|  | Current Limit |  | 1A minimum |  |  |  |
|  | Output Protection |  | Output will withstand up to 16 V forward voltage. Diode clamp reverse protection for currents up to 3A. |  |  |  |
|  | Ripple \& Noise (20MHz Bandwidth) |  | Typically <1m Vrms |  |  |  |
|  | Load Regulation |  | <1-0\% for 90\% load change |  |  |  |
|  | Line Regulation |  | <0-1\% for a 10\% line voltage change |  |  |  |
|  | Status Indication |  | Current limit lamp. |  |  |  |
| General Specifications |  |  |  |  |  |  |
| Operational AC Input Voltage | 115 V or $230 \mathrm{~V} \pm 10 \%$ (adjustable internally, option HV for factory set 230 Vac input), $50 / 60 \mathrm{~Hz}$. Installation Category II |  |  |  |  |  |
| Operating Temperature Range | 5 to $40^{\circ} \mathrm{C}, 20 \%$ to $80 \% \mathrm{RH}$ |  |  |  |  |  |
| Storage Temperature Range | -40 to $70^{\circ} \mathrm{C}$ |  |  |  |  |  |
| Dimensions ( H W $\mathrm{W} \times \mathrm{D}$ ) | $\begin{aligned} & 6.3 \times 5.5 \times 11.4^{\prime \prime}(160 \times 140 \times 290 \mathrm{~mm})(\text { XDL } 35-5, \text { XDL 35-5P, XDL } 56-4, \text { XDL 56-4P), } \\ & 6.3 \times 11.0 \times 11.4^{\prime \prime}(160 \times 280 \times 290 \mathrm{~mm}) \text { (XDL 35-5T, XDL 35-5TP) } \end{aligned}$ |  |  |  |  |  |
| Weight | $\begin{aligned} & 11.9 \mathrm{lb}(5.4 \mathrm{~kg})(\mathrm{XDL} 35-5, \text { XDL 56-4) } \\ & 12.1 \mathrm{lb}(5.5 \mathrm{~kg})(\mathrm{XDL} 35-5 \mathrm{SP}, \text { XDL } 56-4 \mathrm{P}) \\ & 23.1 \mathrm{lb}(10.5 \mathrm{~kg})(\mathrm{XDL} 35-5 \mathrm{~T}) \\ & 23.3 \mathrm{lb}(10.6 \mathrm{~kg}) \text { (XDL } 35-5 \mathrm{TP}) \end{aligned}$ |  |  |  |  |  |
| Benchtop Operation | Folding legs are incorporated that can be used to angle the front panel upwards when required |  |  |  |  |  |
| Rack Mount Operation | 19-inch 4U mount for up to three single output units or one triple, plus one single Blanking plates available for unused sections |  |  |  |  |  |
| Approvals | CE-marked units meet: EN61010-1 and EN61326 |  |  |  |  |  |
