

FEATURES:

Model 6475 is a set of two each of the following five probes that fit Pomona probes that use the 0.060 inch ((1.52mm) diameter test probe tips.

Sharp Stainless-Steel Tip

- Rigid stainless-steel tip is hardened for heavy duty use
- Sharp, hardened point will penetrate conformal coatings and heavy surface contamination

Nickel Plated Brass Tip

- Rigid nickel plated brass tip is perfect for precision measurement
- Sharp tip resists wear
- This is the best tip for every day use

Triple Point Micro Tip

- Gold plated pogo pin tip has .018" diameter Tip with three sharp points
- Sharp point digs into soft metals like solder for low resistance connections
- Self-cleaning tip pierces surface coatings or contamination

Sharp Point Tip

- Pogo pin helps to hold the test point even if the probe is moved

- Gold plated pogo pin tip has a sharp tapered point
- Sharp point digs into soft metals like solder for low resistance connections
- Self-cleaning tip pierces surface coatings or contamination
- Pogo pin helps to hold the test point even if the probe is moved

Triple Point Tip

- Gold plated pogo pin tip has three sharp points
- Sharp point digs into soft metals like solder for low resistance connections
- Self-cleaning tip pierces surface coatings or contamination
- Pogo pin helps to hold the test point even if the probe is moved
